Response	
analyze data continued	
Community meetings held in all 3 wards and an additional community meeting held in Spanish at the Hispanic Center of Western Michigan Community survey completed through 311	
Because the current system of light replacement is a complaint-based system, many residents were not aware of how to access the system. This was seen specifically in the following neighborhoods (based on the survey results).	
Lack of understanding on how to access current systems has caused inequities.	
By the city proactively designing a preventative maintenance program, all sectors of the city will receive equitable service in ensuring that the street lights are maintained.	
nimize harm	
Utilize a preventative maintenance strategy to minimize harm to neighborhoods	
Review other complaint-based policies to determine impact based on race	
Continue partnership with communities by following up and continuing survey options	
Evaluate, raise racial awareness and be accountable	
The program will be evaluated by monitoring the number and locations of complaints received through the 311 data monitoring system. The Traffic Safety Manager will be responsible for reporting to the City Manager and City Commission on the success and challenges of the program.	
Nothing known was left unresolved.
